Dear Sir:

I am very much interested in N.F.O. There was a article in the Cleveland Press, saying there isn't much sightings in N.F.O. - There are many who see them but they do not make the report: I belong to a N.F.O. Group & do sky studies.

At home from my window it was March 3 or 4 when I saw a bright light ~~stop~~ stop, lights went ~~out~~ & then on again to go to the 2nd - It came south. It was bright as a starlite - at arms length it would cover a nickel:

The strongest I have seen was in March, date I have forgotten but it must be around 7 or 11 it tracked from east to west not very high in the sky from the up stairs window

2.

It was below eyes level, so to
the ground it could have a
35 degree angle - This is
the shape of it to me it is
a saucer

Blue White streak

This is what I couldn't
make out

It went so fast I couldn't make
out what was in front of it
before I had a chance it went
behind a cloud - The blue streak
lasted 5 sec. It was the most
beautiful thing I have ever seen -
It was big (at arms length - from
my elbow to the tips of my fingers).
(Beautiful)

June 24th at 21 Twenty to one
in the morn. going west to east
at below eyes level at the window
A orange yellow light twinkling
rather odd - its cause looked
like this

|||||

3

Arm Length About a quarter
The only trouble was I got to the
window a little late, had
I been a sec sooner I could
have made it out better - It
was snow Mictrorite - Also many
times at 7.30 P.M. I have often
stars more around - I alone don't
see this. I have a girl friend
who see these stars travel -
We are also watching for them:

There is another exciting thing
that happened when I got
a big kick from

A black Cadillac came
down the street about 3.30 A.M.
stop in front of my house.
They looked at my house then
went down the street &
came back slowly looked again
& then took off - No harm
done. I couldn't get the license
because I was alone & didn't
want to go out

Please give me information
on Dr. F. O. and Sighting
dates etc - Thank you

Mrs.
